# Terms and conditions of the open competition for the “2021 MUBIL Mobility Awards”.

## 1. Purpose.

The purpose of these terms and conditions is to regulate the “2021 MUBIL Mobility Awards”.

The MUBIL strategy focuses on turning the Basque Country into an international industrial benchmark in terms of new mobility and energy storage. The strategy emerges in the new mobility Pole, a space-ecosystem for encounters, interaction and integration in which new opportunities are generated. A scenario where innovation is transformed into a factor of strategy and competitiveness for entrepreneurial and social development.

In this context, the 2021 MUBIL awards seek to reward high-impact technology projects which have at least reached the prototype phase, understood as the phase featuring a minimum viable product or a mock-up (representation, demonstration or simulation) which solves the problem identified, and is in line with the acting scope of the MUBIL strategy. Specifically:

- Connected mobility.
- Autonomous mobility.
- Shared mobility.
- Electric mobility.
- Related infrastructures.
